This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- This work tackles the marker identification process as a classification problem.
- Methodology proposed to train the classifiers with a synthetic dataset of markers.
- Our proposal can identify markers under very difficult image conditions.
- The proposed method performs significantly better than previous approaches.
