This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Treatment of intestinal fibrosis in experimental inflammatory bowel disease by the pleiotropic actions of a local Rho kinase inhibitor

Short title: Local ROCK inhibition resolves intestinal fibrosis

Authors:

Tom Holvoet[1], Sarah Devriese[1], Karolien Castermans[2], Sandro Boland[2], Dirk Leysen[2], Yves-Paul Vandewynckel[1], Lindsey Devisscher[1], Lien Van den Bossche[1], Sophie Van Welden[1], Melissa Dullaers[3,4], Roosmarijn E Vandenbroucke[3,5], Riet De Rycke[3,5], Karel Geboes[6], Arnaud Bourin[2], Olivier Defert[2], Pieter Hindryckx[1], Martine De Vos[1] and Debby Laukens[1]
