This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We consider the Resource Availability Cost Problem and two extensions.
- One of the extensions is not treated in literature until now.
- Mixed-Integer Linear and Constraint Programming formulations are presented.
- All open instances from literature can be solved to proven optimality.
- We provide new test sets and make them available online.
