This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Household modelling highlights ways to increase goat production
- Large increases in goat meat production are possible in Ethiopia and India
- Increasing goat production did not always increase household income
- Yield gaps are best addressed by integrated technologies using a systems approach
