Rapid degradation of brominated and iodinated haloacetamides with sulfite in drinking water: Degradation kinetics and mechanisms

Shunke Ding, Feifei Wang, Wenhai Chu, Zhongqi Cao, Yang Pan, Naiyun Gao

PII: S0043-1354(18)30499-8

DOI: 10.1016/j.watres.2018.06.049

Reference: WR 13876

To appear in: *Water Research*

Received Date: 30 April 2018

Revised Date: 19 June 2018

Accepted Date: 20 June 2018

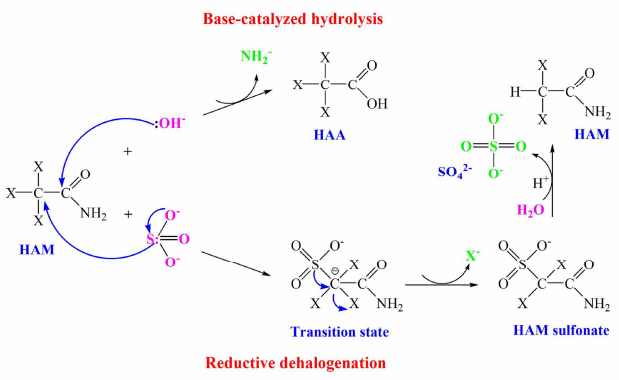
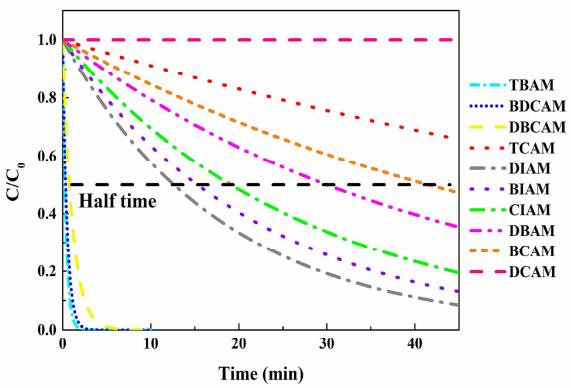
This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.



X=Cl, Br, I, or H



Reaction conditions: sodium sulfite conc. = 50 μM, pH = 7.5.
