

## Accepted Manuscript

Title: Involvement of angiotensin-(1-7) in the neuroprotection of captopril against focal cerebral ischemia

Authors: Meng-Xing Tao, Xiao Xue, Li Gao, Jun-Ling Lu, Jun-Shan Zhou, Teng Jiang, Ying-Dong Zhang

PII: S0304-3940(18)30630-X  
DOI: <https://doi.org/10.1016/j.neulet.2018.09.024>  
Reference: NSL 33813

To appear in: *Neuroscience Letters*

Received date: 13-7-2018  
Revised date: 4-9-2018  
Accepted date: 13-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **Involvement of angiotensin-(1-7) in the neuroprotection of captopril against focal cerebral ischemia**

**E-mail:** zhangyingdong@aliyun.com (Prof. Ying-Dong Zhang) and jt870918@163.com (Dr. Teng Jiang)

### **Highlights**

1. Captopril significantly increases brain Ang-(1-7) levels in rats
2. Captopril reduces brain infarct volume and neurological deficits in rats with pMCAO
3. The captopril-induced neuroprotection is reversed by Ang-(1-7) receptor blocker A-779
