Idealized large-eddy simulation study of interaction between urban heat island and sea breeze circulations

Lidu Shen, Jianning Sun, Renmin Yuan

PII: S0169-8095(18)30471-X
DOI: doi:[10.1016/j.atmosres.2018.08.010](https://doi.org/10.1016/j.atmosres.2018.08.010)
Reference: ATMOS 4340
To appear in: *Atmospheric Research*
Received date: 13 April 2018
Revised date: 12 July 2018
Accepted date: 17 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Idealized Large-Eddy Simulation Study of Interaction between Urban Heat Island and Sea Breeze Circulations
