## Case Study

### Feeding Frequency Influences Process Performance and Microbial Community Composition in Anaerobic Digesters Treating Steam Exploded Food Waste

Kine Svensson, Lisa Paruch, John Christian Gaby, Roar Linjordet

PII: S0960-8524(18)31200-8  
DOI: <https://doi.org/10.1016/j.biortech.2018.08.096>  
Reference: BITE 20379

To appear in: *Bioresource Technology*

Received Date: 2 July 2018  
Revised Date: 20 August 2018  
Accepted Date: 21 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Feeding Frequency Influences Process Performance and Microbial  
Community Composition in Anaerobic Digesters Treating Steam  
Exploded Food Waste**
