Measurement of the true ileal calcium digestibility of some feed ingredients for broiler chickens

Running Title: Calcium digestibility of feed ingredients

M.N. Anwar[a], V. Ravindran[a,*], P.C.H. Morel[a], G. Ravindran[b], A.J. Cowieson[c]

*** Corresponding author.** V.Ravindran@massey.ac.nz

Highlights

- True calcium digestibility of two inorganic phosphates and three ingredients was determined in broilers using the direct method.
- True ileal calcium digestibility coefficients of these sources determined to be low, ranging between 0.24 and 0.33.
