Running head: Comparison of effect of sNMES and mNMES after TKA

Title: Comparison of the effect of sensory-level and conventional motor-level neuromuscular electrical stimulation on quadriceps strength after total knee arthroplasty: a prospective randomized single-blind trial

Author: Yosuke Yoshida, MSc[a,c], Koki Ikuno, PhD [b,c], Koji Shomoto, PhD [c]

Institution: [a] Department of Rehabilitation Medicine, Yamato Kashihara Hospital, Nara, Japan

[b] Department of Rehabilitation Medicine, Nishiyamato Rehabilitation Hospital, Nara, Japan

[c] Department of Physical Therapy, Faculty of Health Science, Kio University, Nara, Japan

This trial was performed at the Yamatokashihara Hospital Total Arthroplasty Center between June 2014 and March 2015 participated in this trial.

This manuscript has not been published and is not under consideration for publication elsewhere.
