Title: Time-resolved X-Ray fluorescence analysis of element distribution and concentration in living plants: An example using manganese toxicity in cowpea leaves

Authors: F. Pax C. Blamey, David J. Paterson, Adam Walsh, Nader Afshar, Brigid A. McKenna, Miaomiao Cheng, Caixian Tang, Walter J. Horst, Neal W. Menzies, Peter M. Kopittke

PII: S0098-8472(18)31076-1
DOI: <https://doi.org/10.1016/j.envexpbot.2018.09.002>
Reference: EEB 3563

To appear in: *Environmental and Experimental Botany*

Received date: 16-7-2018
Revised date: 28-8-2018
Accepted date: 3-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Time-resolved X-Ray fluorescence analysis of element distribution and concentration in living plants: An example using manganese toxicity in cowpea leaves

Highlights

- A novel method using synchrotron-based micro X-ray fluorescence
- Provides laterally-resolved, multi-element, kinetic, *in vivo* analyses of plants
- Allows a wide range of studies for the examination of plant responses
