This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- use emotion-relevant activities as a new information source to support emotion recognition
- generalised sequence feature-based technique to recognise postural activities
- sensor- and feature-level fusion to jointly process pressure and inertial data
