This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- There is sex by genotype interaction for body weight in broiler chickens.
- Age by genotype interaction should be taken in to account in genetic analysis of body weight in broiler chickens.
- Genetic evaluation models for body weight in broiler chickens should take in to account sex and age differences to increase accuracy of selection.
