

## Accepted Manuscript

Title: Substantial evidence for the rhododendrol-induced generation of hydroxyl radicals that causes melanocyte cytotoxicity and induces chemical leukoderma

Authors: Yu Gabe, Akimitsu Miyaji, Masahiro Kohno, Akira Hachiya, Shigeru Moriwaki, Toshihide Baba

PII: S0923-1811(18)30250-0  
DOI: <https://doi.org/10.1016/j.jdermsci.2018.06.007>  
Reference: DESC 3396

To appear in: *Journal of Dermatological Science*

Received date: 18-2-2018  
Revised date: 20-5-2018  
Accepted date: 21-6-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Substantial evidence for the rhododendrol-induced generation of hydroxyl radicals that causes melanocyte cytotoxicity and induces chemical leukoderma**
