This work was performed at the Implant Research Center at Drexel University.

This study was supported, in part, by NIH/NIAMS R01 AR47904. Institutional support has been received from Stryker, Zimmer Biomet, Invibio, Stelkast, Wright Medical Technology, Ceramtec, Celanese, Simplify Medical, and Ferring Pharmaceuticals.

Each author certifies that the institution where the work was performed approved the human protocol for this investigation, that all investigations were conducted in conformity with ethical principles of research. This document has not been submitted to any other journal.
