This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Multi-objective supplier portfolio optimization based on portfolio theory
- A posteriori solution approach including risk and sustainability aspects
- Computation of the entire, non-approximated Pareto front
- Holistic representation of sustainability and risk
- Insights into effects of sustainability on optimal supplier portfolios
