This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Funding decisions can benefit from multi-attribute utility theory.
- Value Focused Thinking can reinforce the strategic alignment of funding programs.
- We suggest that agency personnel should be in the role of decision-makers.
- We suggest that attributes of value functions should be based on factual information.
- Factual assessments provided by reviewers serve as data for program evaluation.
