This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We construct a model for city resident green awareness-behavior spreading with policy regulation.
- The promotion from government policy plays the most important role in city resident green behavior spreading.
- Under the directly impact from government, green awareness hardly works on city resident green behavior.
