

Journal of Controlled Release Vol. 171, No. 3, 2013

Contents

PREFACE

Preface-tenth international nanomedicine and drug delivery symposium (NanoDDS'12)

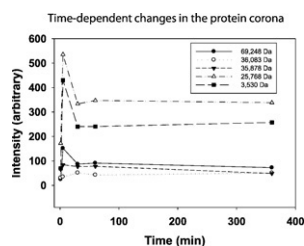

p 259–260

Tamara Minko*, Arash Hatefi

The effects of lipoplex formulation variables on the protein corona and comparisons with *in vitro* transfection efficiency

pp 261–268

Jamie L. Betker, Joe Gomez, Thomas J. Anchordoquy*

A rapamycin-binding protein polymer nanoparticle shows potent therapeutic activity in suppressing autoimmune dacryoadenitis in a mouse model of Sjögren's syndrome

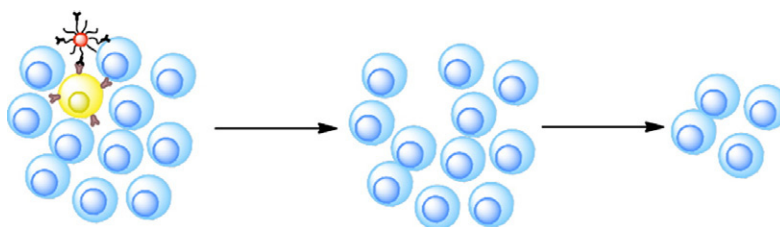

pp 269–279

Mihir Shah, Maria C. Edman, Srikanth R. Janga, Pu Shi, Jugal Dhandhukia, Siyu Liu, Stan G. Louie, Kathleen Rodgers, J. Andrew MacKay, Sarah F. Hamm-Alvarez*

CD133-targeted paclitaxel delivery inhibits local tumor recurrence in a mouse model of breast cancer

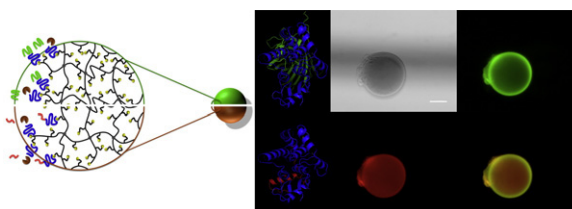

pp 280–287

Suresh Kumar Swaminathan, Emilie Roger, Udaya Toti, Lin Niu, John R. Ohlfest, Jayanth Panyam *

**Proteolytically activated anti-bacterial hydrogel microspheres**

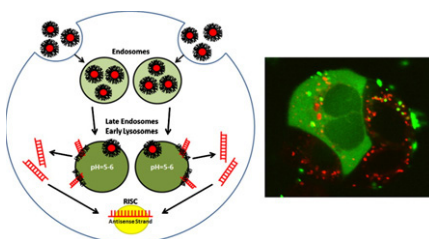

pp 288–295

Jason S. Buhrman, Laura C. Cook, Jamie E. Rayahin, Michael J. Federle, Richard A. Gemeinhart *

**Design and evaluation of new pH-sensitive amphiphilic cationic lipids for siRNA delivery**

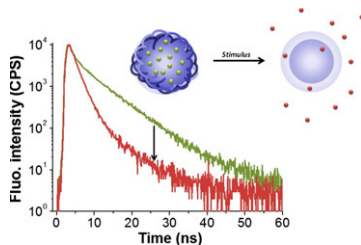

pp 296–307

Anthony S. Malamas, Maneesh Gujrati, China M. Kummitha, Rongzuo Xu, Zheng-Rong Lu *

**Application of time-resolved fluorescence for direct and continuous probing of release from polymeric delivery vehicles**

pp 308–314

Mathieu L. Viger, Wangzhong Sheng, Cathryn L. McFearin, Mikhail Y. Berezin, Adah Almutairi *
