This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Research Highlights

- We propose a new ensemble of classifier built from decision trees and RVFL.
- RVLF is used in each base classifier to partition the training samples.
- Decision trees are grown for each class.
- The proposed method is tested in 65 multi-class UCI datasets.
- The results demonstrate the efficacy of our proposed method.
