

Accepted Manuscript

Host specificity of avian haemosporidian parasites is unrelated among sister lineages but shows phylogenetic signal across larger clades

Vincenzo A. Ellis, Staffan Bensch

PII: S0020-7519(18)30166-8
DOI: <https://doi.org/10.1016/j.ijpara.2018.05.005>
Reference: PARA 4082

To appear in: *International Journal for Parasitology*

Received Date: 30 January 2018
Revised Date: 16 April 2018
Accepted Date: 8 May 2018

Please cite this article as: Ellis, V.A., Bensch, S., Host specificity of avian haemosporidian parasites is unrelated among sister lineages but shows phylogenetic signal across larger clades, *International Journal for Parasitology* (2018), doi: <https://doi.org/10.1016/j.ijpara.2018.05.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 Host specificity of avian haemosporidian parasites is unrelated among sister lineages but shows
2 phylogenetic signal across larger clades
