Methane/air premixed flame topology structure in a mesoscale combustor with a plate flame holder and preheating channels

Jianlong Wan, Zuwei Xu, Haibo Zhao

PII: S0360-5442(18)31944-3

DOI: [10.1016/j.energy.2018.09.172](https://doi.org/10.1016/j.energy.2018.09.172)

Reference: EGY 13866

To appear in: *Energy*

Received Date: 12 March 2018

Revised Date: 18 June 2018

Accepted Date: 26 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Methane/air premixed flame topology structure in a mesoscale combustor**
2 **with a plate flame holder and preheating channels**
