This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

1. ANGPTL8 elevation is associated with T2D, with a minimal BMI effect
2. Increase in ANGPTL8 post-LSG was exclusive to participants with T2D
3. Increase in ANGPTL8 post-LSG is independent of the increase in %EWL and %EBMIL
4. Unique biphasic pattern of change in ANGPTL8 post-LSG in participants with T2D
