Mathematical Models for On-Line Train Calendars Generation

Lavinia Amorosi, Paolo Dell'Olmo, Giovanni Luca Giacco

PII: S0305-0548(18)30250-8
DOI: <https://doi.org/10.1016/j.cor.2018.09.009>
Reference: CAOR 4557

To appear in: *Computers and Operations Research*

Received date: 23 April 2018
Revised date: 18 September 2018
Accepted date: 18 September 2018

Please cite this article as: Lavinia Amorosi, Paolo Dell'Olmo, Giovanni Luca Giacco, Mathematical Models for On-Line Train Calendars Generation, *Computers and Operations Research* (2018), doi: <https://doi.org/10.1016/j.cor.2018.09.009>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A new mathematical programming model for textual calendars generation is proposed and experimentally evaluated.
- The optimality of the obtained solutions guarantees the maximum conciseness and understandability of the corresponding sentences.
- The model ensures the effectiveness of the approach for practical utilization
