

## Accepted Manuscript

Title: The use of an innovative inverse numerical modeling method for the evaluation and parameter estimation of barberry anthocyanins ultrasound assisted extraction

Authors: Mina Homayoonfal, Seyed Mohammad Mousavi, Hossein Kiani, Gholamreza Askari, Maryam Khani, Mahmoud Rezazadeh Bari, Mohammad Alizadeh

PII: S0255-2701(18)30696-2  
DOI: <https://doi.org/10.1016/j.cep.2018.09.011>  
Reference: CEP 7380

To appear in: *Chemical Engineering and Processing*

Received date: 5-6-2018  
Revised date: 15-8-2018  
Accepted date: 12-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# The use of an innovative inverse numerical modeling method for the evaluation and parameter estimation of barberry anthocyanins ultrasound assisted extraction

## Graphical abstract

## Highlights

- The inverse numerical simulation is an accurate and powerful technique to investigate transport properties of food processes.
- The inverse modelling approach are able to simultaneously estimate process coefficient including  $k_c$ ,  $D_e$ ,  $E$ , and  $k_{deg}$  ultrasound-assisted extraction of barberry anthocyanin compounds.
