This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- The proposed scheme can achieve higher visual security of cipher image.
- The proposed scheme is immune to CPA with the assistance from parallel compressive sensing counter mode.
- The cipher image shows superior security performance in terms of imperceptibility.
- The reconstructed image possesses more satisfactory quality.
