

## Accepted Manuscript

The building of molecularly imprinted single hole hollow particles: A miniemulsion polymerization approach

Zehu Wang, Teng Qiu, Longhai Guo, Jun Ye, Lifan He, Xiaoyu Li

PII: S1385-8947(18)31845-X  
DOI: <https://doi.org/10.1016/j.cej.2018.09.128>  
Reference: CEJ 19967

To appear in: *Chemical Engineering Journal*

Received Date: 26 May 2018  
Revised Date: 15 September 2018  
Accepted Date: 17 September 2018

Please cite this article as: Z. Wang, T. Qiu, L. Guo, J. Ye, L. He, X. Li, The building of molecularly imprinted single hole hollow particles: A miniemulsion polymerization approach, *Chemical Engineering Journal* (2018), doi: <https://doi.org/10.1016/j.cej.2018.09.128>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title page****The building of molecularly imprinted single hole hollow particles: A  
miniemulsion polymerization approach**
