A weak infrared light strengthens anoxygenic photosynthetic bacteria activated sludge for the anaerobic biodegradation of polylactic acid in microbial fuel cell systems

Xiang Qi, Enling Tian, Yiwei Ren, Xingzu Wang

PII: S0141-3910(18)30304-5

DOI: [10.1016/j.polyimdeggradstab.2018.09.024](https://doi.org/10.1016/j.polyimdeggradstab.2018.09.024)

Reference: PDST 8649

To appear in: *Polymer Degradation and Stability*

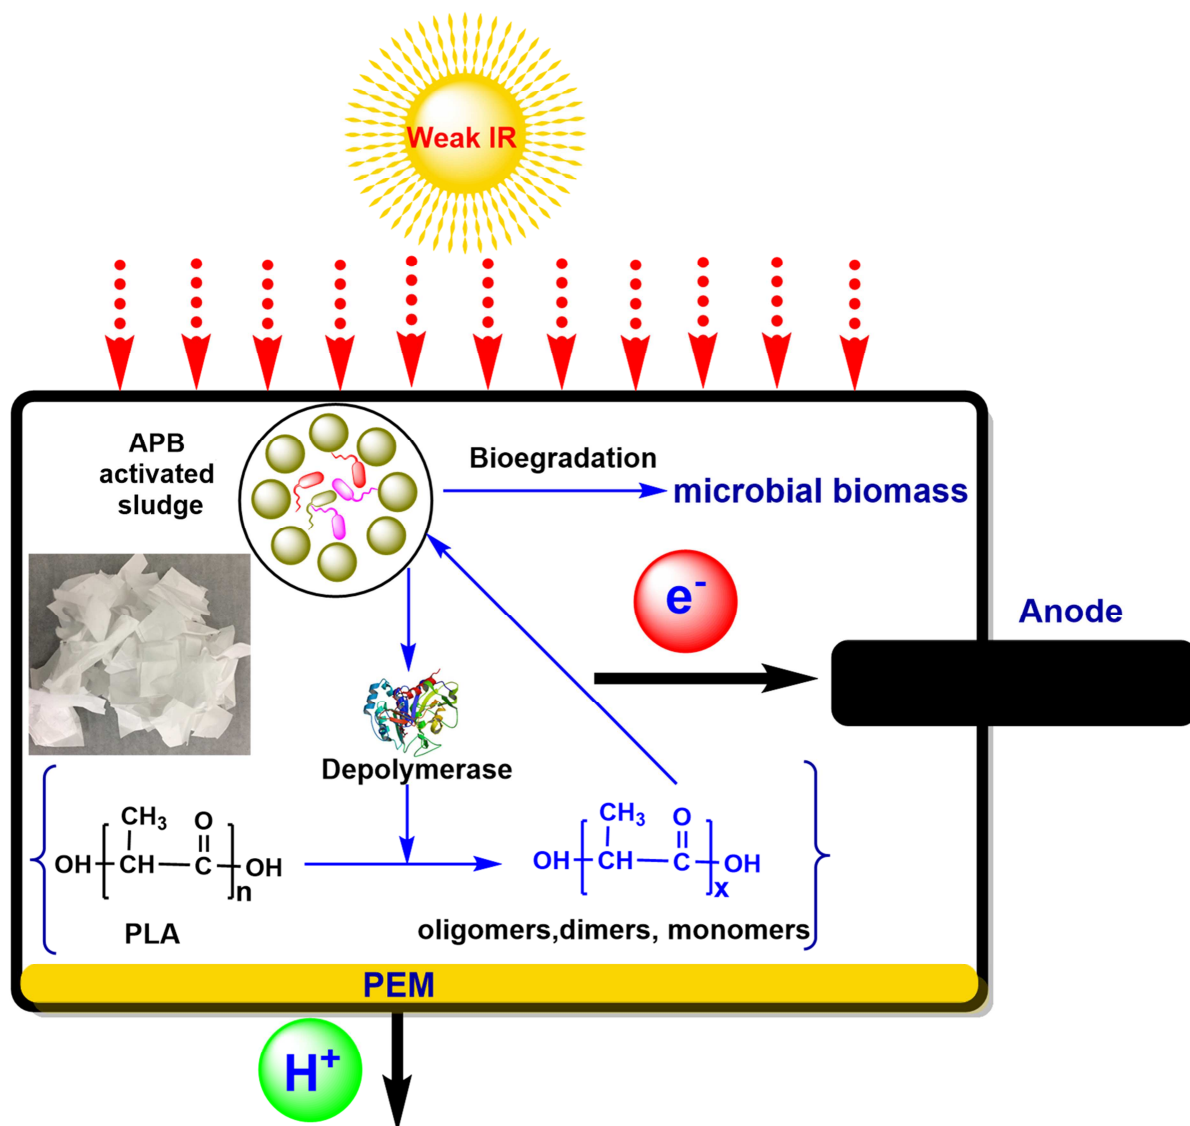

Received Date: 21 June 2018

Revised Date: 22 September 2018

Accepted Date: 26 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
