Title: Understanding of the contribution of the fungal treatment conditions in a wheat straw biorefinery that produces enzymes and biogasnull

Authors: Sandra Albornoz, Valentina Wyman, Carolyn Palma, Andrea Carvajal

PII: S1369-703X(18)30322-X
DOI: <https://doi.org/10.1016/j.bej.2018.09.011>
Reference: BEJ 7040

To appear in: *Biochemical Engineering Journal*

Received date: 5-6-2018
Revised date: 17-8-2018
Accepted date: 12-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Understanding of the contribution of the fungal treatment conditions in a wheat straw
biorefinery that produces enzymes and biogas**
