This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Freshwater turtles reveal personality traits in their antipredatory behaviour

Running title: Personality in freshwater turtles

E-mail address: masterfauna@unipv.it (D. Pellitteri-Rosa).

Highlights

- Consistent individual differences in animal behaviour may reveal the presence of personality traits
- We tested two freshwater turtle species by simulating a predatory attack and detecting antipredatory behavioural responses
