This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Running head: VISUAL WORKING MEMORY CAPACITY IN ANXIETY

1

Highlights

- Trait anxiety restricted visual working memory capacity for faces
- Reduced visual working memory capacity in anxiety did not depend on emotional valence
- Anxiety-related change in visual working memory resolution was not significant
