Author contributions: All authors contributed to study conceptualization. C.A.D., W-J.C., M.R., M.S., and M.B. conducted data collection and preparation. C.A.D. drafted the paper, C.A.D. and W-J.C. conducted the data analysis. N.C. reviewed drafts and made comments. All authors contributed to final report preparation.

Funding: There were no sources of funding to report for the current study.

Conflict of Interest: All authors do not have conflict of interest disclosures to report.

Ethical Approval: Data for this study was drawn from a larger repository maintained in an outpatient psychology clinic that is approved for research use by the local Institutional Review Board (IRB).

Informed Consent: All participants were provided the opportunity to accept or decline approval for subsequent analysis of de-identified data for anonymized research use in compliance with IRB ethics and approval.
