Signal Reconstruction from Interferometric Measurements under Sensing Constraints

Davood Mardani, George K. Atia, Ayman F. Abouraddy

PII: S0165-1684(18)30340-2
DOI: <https://doi.org/10.1016/j.sigpro.2018.10.009>
Reference: SIGPRO 6960

To appear in: *Signal Processing*

Received date: 24 January 2018
Revised date: 9 September 2018
Accepted date: 8 October 2018

Please cite this article as: Davood Mardani, George K. Atia, Ayman F. Abouraddy, Signal Reconstruction from Interferometric Measurements under Sensing Constraints, *Signal Processing* (2018), doi: <https://doi.org/10.1016/j.sigpro.2018.10.009>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Developing a unifying framework for signal recovery from interferometric measurements
- Compressive recovery under constraints imposed by the interferometer structure
- Establishing performance guarantees on compressive recovery under sensing constraints
- Devising controlled sampling policies to collect more informative measurements
