Acidic Polymeric Ionic Liquids Based Reduced Graphene Oxide: An Efficient and Rewriteable Catalyst for Oxidative Desulfurization

Hairan Zhang, Qian Zhang, Ling Zhang, Tingting Pei, Li Dong, Pengyu Zhou, Chaoqi Li, Lixin Xia

PII: S1385-8947(17)31748-5
DOI: <https://doi.org/10.1016/j.cej.2017.10.042>
Reference: CEJ 17826

To appear in: *Chemical Engineering Journal*

Received Date: 22 August 2017
Revised Date: 3 October 2017
Accepted Date: 9 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Acidic Polymeric Ionic Liquids Based Reduced Graphene
Oxide: An Efficient and Rewriteable Catalyst for Oxidative
Desulfurization**
