

Accepted Manuscript

Title: Porous carbon electrode for Li-air battery fabricated from solvent expansion during supercritical drying

Authors: Nattanaï Kunanusont, Yusuke Shimoyama

PII: S0896-8446(17)30443-6
DOI: <https://doi.org/10.1016/j.supflu.2017.09.030>
Reference: SUPFLU 4056

To appear in: *J. of Supercritical Fluids*

Received date: 29-6-2017
Revised date: 27-9-2017
Accepted date: 27-9-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manuscript submitted to The Journal of Supercritical Fluids

Porous carbon electrode for Li-air battery fabricated from solvent
expansion during supercritical drying
