This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Three primary TSV motivations were identified: social co-viewing, engagement, and passing time.
- Social interactions were categorized into social sharing and issue surveillance..
- Engagement and passing time were associated with social sharing.
- Innovativeness and BAS had significant impacts on TSV users' motivations.
