This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- An effective system for offline text independent writer identification is proposed.
- A reliable writing style representation model for feature extraction is proposed.
- Proposed system evaluated on four challenging databases (two English and two Arabic).
- High identification rates on AHTID\MW, IFN/ENIT and CVL databases.
- Identification rates are recorded over random subdivisions.
