Hierarchical Trajectory Clustering for Spatio-temporal Periodic Pattern Mining

Dongzhi Zhang, Kyungmi Lee, Ickjai Lee

PII: S0957-4174(17)30645-0
DOI: [10.1016/j.eswa.2017.09.040](https://doi.org/10.1016/j.eswa.2017.09.040)
Reference: ESWA 11561

To appear in: *Expert Systems With Applications*

Received date: 1 April 2017
Revised date: 14 September 2017
Accepted date: 15 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Propose a hierarchical trajectory clustering framework for periodic pattern mining
- Propose a trajectory clustering approach that considers additional semantics
- Extend the proposed clustering to take into account the sequence of trajectory
- Overcome the drawbacks of traditional periodic pattern mining
- Provide experimental results to demonstrate the versatility of proposed framework
