

## Accepted Manuscript

Introducing computational thinking, parallel programming and performance engineering in interdisciplinary studies

Eduardo Cesar, Ana Cortés, Antonio Espinosa, Tomàs Margalef, Juan Carlos Moure,  
Anna Sikora, Remo Suppi

PII: S0743-7315(17)30005-9  
DOI: <http://dx.doi.org/10.1016/j.jpdc.2016.12.027>  
Reference: YJPDC 3600

To appear in: *J. Parallel Distrib. Comput.*

Received date: 13 June 2016  
Revised date: 13 December 2016  
Accepted date: 30 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Master on Modelling for science and engineering was started 5 years ago.

It is an interdisciplinary Master's degree with teacher from mathematics, Physics and Computer Science.

Parallel programming and Applied modelling and simulation are subjects included in the Master's program.

The teaching methodology applied in both topics is completely presented.
