Brain-computer interface connected to telemedicine and telecommunication in virtual reality applications

Wei-Yen Hsu

PII: S0736-5853(15)30071-X
DOI: <http://dx.doi.org/10.1016/j.tele.2016.01.003>
Reference: TELE 765

To appear in: *Telematics and Informatics*

Received Date: 9 November 2015
Revised Date: 13 January 2016
Accepted Date: 13 January 2016

Please cite this article as: Hsu, W-Y., Brain-computer interface connected to telemedicine and telecommunication in virtual reality applications, *Telematics and Informatics* (2016), doi: <http://dx.doi.org/10.1016/j.tele.2016.01.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Brain-computer interface connected to telemedicine and
telecommunication in virtual reality applications
