Preserving Privacy of Online Digital Physiological Signals Using Blind and Reversible Steganography

Hung-Jr Shiu , Bor-Sing Lin , Chien-Hung Huang ,
Pei-Ying Chiang , Chin-Laung Lei

PII: S0169-2607(17)30340-1
DOI: [10.1016/j.cmpb.2017.08.015](https://doi.org/10.1016/j.cmpb.2017.08.015)
Reference: COMM 4478

To appear in: *Computer Methods and Programs in Biomedicine*

Received date: 17 March 2017
Revised date: 18 July 2017
Accepted date: 21 August 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Privacy preserving is important to keep private data of patients
- The proposed research adopts steganography using modified error correcting coding to achieve privacy preserving
- The capacity performance is higher than previous works
- The time complexity and robustness are evaluated
