This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We introduce a MS-VNS metaheuristic for solving the maximum ratio clique problem.
- The metaheuristic is tested on standard test instances.
- We compare our results with solutions from classic methods.
- MS-VNS achieves high quality solutions in very short runtimes.
