The static bike relocation problem with multiple vehicles and visits

Teobaldo Bulhões, Anand Subramanian, Güneş Erdoğan,  
Gilbert Laporte

PII: S0377-2217(17)30567-2  
DOI: [10.1016/j.ejor.2017.06.028](https://doi.org/10.1016/j.ejor.2017.06.028)  
Reference: EOR 14510

To appear in: *European Journal of Operational Research*

Received date: 16 August 2016  
Revised date: 5 May 2017  
Accepted date: 7 June 2017

Please cite this article as: Teobaldo Bulhões, Anand Subramanian, Güneş Erdoğan, Gilbert Laporte, The static bike relocation problem with multiple vehicles and visits, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.06.028](https://doi.org/10.1016/j.ejor.2017.06.028)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A branch-and-cut algorithm over an incomplete integer programming model is presented
- An iterated local search algorithm with efficient move evaluation schemes is proposed
- We report results for new benchmark instances ranging from 13 to 200 stations
