This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We analyzed and assessed the literature published on embedding MCDM and sustainability
- A set of 268 articles appearing in ISI Web of Science database was analyzed
- Two discrete MCDM techniques were those most frequently used: AHP and WAM
- A high percentage of MCDM techniques were hybridized with GDM techniques
