This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An updated taxonomy of Dynamic Selection techniques is proposed
- A review of the state-of-the-art dynamic selection techniques is presented
- Empirical comparison between 18 dynamic selection techniques is conducted
- We discuss about the recent findings and open research question in this field
