This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Identify factors that influence the task allocation activity of a GSD project.
- Implement an SLR and questionnaire survey methodologies to collect evidence.
- Identify 11 factors that influence the task allocation activity in a GSD project.
- The results indicate that the SLR findings and the industry experts' feedback are aligned.
- The results are analyzed in relation to centralized and distributed project structures.
