Iteratively reweighted blind deconvolution for passive millimeter-wave images

Houzhang Fang, Yu Shi, Donghui Pan, Gang Zhou

PII: S0165-1684(17)30031-2
DOI: [10.1016/j.sigpro.2017.01.021](https://doi.org/10.1016/j.sigpro.2017.01.021)
Reference: SIGPRO 6380

To appear in: *Signal Processing*

Received date: 21 September 2016
Revised date: 14 January 2017
Accepted date: 21 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Iteratively reweighted mechanism is incorporated into blind deconvolution model.
- The proposed method can handle the strong noise and the mixed noise.
- Derive a formula to automatically update the regularization parameters.
- The method works well on real passive millimeter-wave images.
