This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Thermoplastic cassava starch-chitosan bilayer films containing essential oils

Cristina Valencia-Sullca, María Vargas*, Lorena Atarés, Amparo Chiralt

Instituto de Ingeniería de Alimentos para el Desarrollo, Universitat Politècnica de

València

*mavarco@tal.upv.es

- Starch-chitosan thermo-compressed bilayer films showed good interfacial adhesion.
- Bilayer films showed better mechanical resistance than starch monolayers.
- Starch-chitosan bilayers reduced bacterial growth in cold-stored sliced pork meat.
