

## Accepted Manuscript

Adsorptive removal of arsenic from groundwater using chemically treated iron ore slime incorporated mixed matrix hollow fiber membrane

Somak Chatterjee, Sirshendu De

PII: S1383-5866(16)31640-9

DOI: <http://dx.doi.org/10.1016/j.seppur.2017.02.019>

Reference: SEPPUR 13548

To appear in: *Separation and Purification Technology*

Received Date: 7 September 2016

Revised Date: 31 January 2017

Accepted Date: 6 February 2017

Please cite this article as: S. Chatterjee, S. De, Adsorptive removal of arsenic from groundwater using chemically treated iron ore slime incorporated mixed matrix hollow fiber membrane, *Separation and Purification Technology* (2017), doi: <http://dx.doi.org/10.1016/j.seppur.2017.02.019>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Adsorptive removal of arsenic from groundwater using chemically treated iron ore slime incorporated mixed matrix hollow fiber membrane**
