This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- *Concept of dynamic memory is described by using the fractional calculus;*
- *General restrictions on memory functions and different examples are considered;*
- *Principle of fading memory;*
- *Principle of memory homogeneity on time (principle of non-aging memory);*
- *Principle of memory reversibility (principle of memory recovery).*
